SPECIALIZED HANDLEBAR CT125/TRAIL125

- Aluminum handlebar specially designed for the CT125 Hunter Cub.
- Wide upbend with the smooth shape that only aluminum handlebars can provide, emphasizing off-road performance and stability.
- Includes position grid for easy setting of handlebar position. (1).
- Installation is a bolt-on design with pre-drilled holes for the switch box. (2)
- Also compatible with ZETA Adventure Armor Handguard CT125 (P45) for easy and secure fit. (3)
- Included stays that fit the stock blinkers, allowing the position to be moved. (4)
- The stock cables and wiring can be installed without modification.
- Sandblasted, black anodized finish.

Please note

No knurling of grip mounting area, crossbar and plastic bar end caps are not included. The stock bar end plugs cannot be used.

Use ZETA bar end plugs or bar end plugs with handlebar inner diameter of 13.8mm. See p.7 for handlebar dimensions. Compatible with stock cables.

The one-piece upper bar clamp helps stabilize handlebar and prevents bar twist when falling down.

One piece stabilizer is set by 4 special bolts. To securely mount handlebar, the clamp is designed to be tightened first with the 2 front side bolts, then the 2 rear side bolts.

Reinforcing ribs are positioned for maximized strength and minimized weight.

Specially designed lower bar clamp provides the option of 8 different back and forth positions in 5 mm increments. (Maximum)

The two holes allow 2 back and forth positions of the handlebar clamp on the top clamp. Utilizing the optional lower clamp enables different handlebar height positions.

Front fork clamp area designed to securely clamp the front fork. Specially designed front fork bolts are made of stainless to prevent corrosion.

(3 mm OFFSET)

ZETA

TRIPLE CLAMP KIT 3 mm OFFSET CLAMP

- 3 mm front fork offset clamp increases trail amount, provides quicker and more stable handling for super moto riding.

Part #	Bike	Year	Color
ZE14-4253	WR250X (3mm offset)	07-17	Black

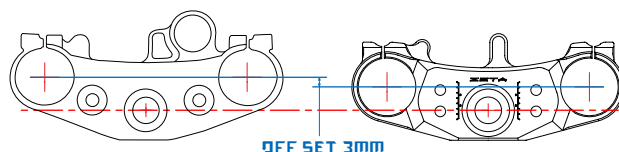

WR250R/X
BLUE

DRZ400SM

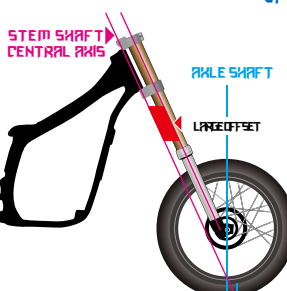

FOR STOCK TRIPLE CLAMP

FOR ZETA OFFSET CLAMP

OFF SET 3mm

Trail small = Low ground contact feeling
Cornering stability = low
Trail amount

Large trail = high ground contact feeling
Cornering stability = high
Trail amount

In the case of the WR250X, the outer diameter of the tire is reduced from 21 inches to 17 inches of the WR250R, so the casters stand and the trail amount is significantly reduced compared to the WR250R. This makes it easier for the steering wheel to be cut or to be affected by swinging the steering wheel at corners.

By bringing the front fork closer to the steering shaft (offset 3 mm), the trail amount is reduced to 17 inches and the stability is improved. The effect is seen from the middle of the corner to the rise of the corner, enabling stable cornering. In addition, the high-rigidity clamp improves stability and drift controllability in high-speed corners.

	28.6 mm		

Can be mounted on either 22.2/28.6mm vehicle bar mount (32-42mm pitch range)

YZ450F

BAR RISE KIT SPACER Dimension

ZETA

BAR RISE KIT SPACER H : 14mm

- Universal spacers that are used in combination with a genuine upper clamp to raise the handle position.
- The height is 14 mm which is suitable for fine adjustment with less interference of wires.
- Can also be used to avoid handle interference when the fork protrusion amount is increased.
- Stainless steel M8 flange bolt 45 mm / M 8 cap bolt 40 mm corresponding to genuine upper clamp shape depending on the model is included 4 each.
- Lineup for standard diameter bar (22.2 mm) and oversized diameter bar (28.6 mm).

Part #	Size (H)
ZE53-0714	22.2 mm
ZE53-0814	28.6 mm

ZETA

RX CLAMP KIT

- Designed for easy installation of over-sized bars (1 1/8") to stock rubber-mounted top clamp.
- Accepts 28.6 mm (1 1/8") handlebars with OEM triple clamps.
- The one-piece top bar mount helps stabilize rubber-mounted bars.
- Made of CNC machined A7009 aluminum.

PIVOT PERCH FP

- High quality CNC machined rotating clutch perch with PIVOT LEVER FP CLUTCH.
- Clutch perch is made of CNC machined 7000 grade aluminum. Lever arm is made of forged aluminum for durable construction, more competitive use for MX or ED.
- Provides 2 different lever ratios, light pulling and accurate clutch control, by changing position of Ratio Device (PAT.1416268).
- Best to use with PIVOT LEVER FP BRAKE.
- 3 finger and 4 finger lever arm models are available.
- Clutch wire adjuster available in red and blue colors.
- Optional hot starter lever is available.

Adjust bolt & Quick cable adjuster

Quick clamp system & Nylon Sleeve

Flex outward

- Quick and easy to adjust clutch play even during the ride.
- Provides the best lever position for any hand size.
- Hinge style clamp for easy and quick maintenance.
- Nylon sleeve placed between the clamp and handlebar allows the perch to rotate upon impact.
- Built-in return spring in the Pivot lever allows the lever to swing forward in the event of crash and prevents lever breakage.

PLASTIC SLEEVE

The plastic sleeve built into the handle clamp rotates when it falls to release the impact and reduce damage to the lever.

THICK DESIGN

Increase the strength of the pivot part, which is easily damaged by the lever, to prepare for the impact of a fall.

LEVER ARM

Forged aluminum has strength and durability with keeping a fine shape design to pursue ease of pulling.

WIRE ADJUSTER

A wire adjuster that can be adjusted by hand without using tools.

LEVER ADJUST BOLT

The reach of the lever arm can be adjusted according to the size of the hand.

MIRROR HOLE

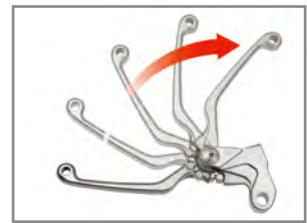

Mirror hole type set for public road (ZE43-5011)

REPLACEMENT

Part #	Description

C. ZE43-9561	Lever
D. ZE43-9571	Wire Adjuster Set
E. ZE43-9590	Dust Cover

Pivot design with return spring allows the lever to fold outward to prevent bending or breaking.

Adjustable

Adjustable reach system provides the perfect lever position for all riders.

CNC Machined Lever arm

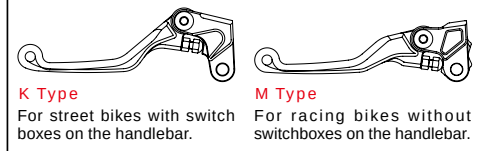

Machined ZETA logo provides better lever grip.

ZETA PIVOT LEVER CP Application : P22-25

- CNC Machined aluminum folding levers.
- The pivot design allows the lever to fold outward to prevent bending or breaking in the event of a crash.
- Hard anodized finish, made of CNC machined aircraft grade aluminum.
- M-type rectilinear lever available for more competitive use.
- Exclusively designed for each bike, available 3 and 4 finger lever lengths.

Part #	Description
ZE41-0192	Brake

Pivot

Pivot design with return spring allows the lever to fold outward to prevent bending or breaking.

Adjustable

Adjustable reach system provides the perfect lever position for all riders.

Forged Lever arm

Smooth surface forged lever arm with laser printed logo.

ZETA

BASE GRIPS RALLY

- Base grip comes with soft compound tubes, great to use for long distance ride and rally touring.
 - Larger diameter with soft tube grip is great for stability and easing vibration.
 - Unique pattern on the tube provides better grip even when covered in mud and water.
 - Outer tube can be installed with wire or glue on base grip.
 - 2 pieces outer tubes for easy installation. One tube comes with 2 safety wiring grooves for secure fit.
 - Available open-end design, replacement tubes are available.
 - Length : 116 mm, Flange: 57 mm , Grip Diameter :33 mm (When the clutch is installed).
- * Touring rally type replacement tube can be attached to the base grip (slim)
* It can be used as SLIM GRIP when the soft compound tube is removed.

FUNCTION

ZETA RACE GRIPS

- Dual compound motocross and enduro racing grip available from ZETA.
- Grip body in gray is made of soft compound to reduce shock, while durable inner layer and grip end improve bar adhesion and give longer grip life.
- The upper half anti-slip diamond pattern provides greater grip, while the waffle pattern on the lower half provides excellent finger grip.
- Incorporates 3 safety wire grooves to allow accurate and secure grip placement.
- Open end design for easy installation of ZETA Armor hand guards.
- Available in 4 different colors.
- Length 119 mm

Part #		Color
Closed end	Open end	
ZE47-5002	ZE47-5102	Red/Gray
ZE47-5003	ZE47-5103	Orange/Gray
ZE47-5006	ZE47-5106	Blue/Gray

ZETA GRIP COVER

- Protective cover for the handlebar grip.
- Prevents dirt of the grip during maintenance, etc.
- Neoprene is used for the material, which has excellent elasticity and fits all kinds of grips.
- The material is soft, so it fits easily over the grip and hand, and does not slip easily when snapping the throttle while wrapped around the grip.
- Prevents deterioration of the grip due to UV rays during long-term storage.

Part #	Size	Contents
ZE49-9001	Width 110mm x Height 125mm (including Velcro part)	2 pcs

Closed End

Non-removable end cap.

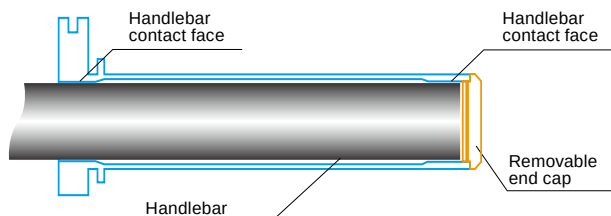

Replacement end cap is not available.

ZETA

ALUMINUM THROTTLE TUBE

- Made of A6061 aluminum with hard anodized finish.
- Removable end cap design allows the use with bar end plugs or aluminum hand guards.
- Quick turn throttle tubes available for dual sport models for better acceleration.
- Special tapered inside tube design keeps the distance between the throttle tube and handlebar, greatly reducing frictional resistance which allows for smoother acceleration.

Adjustable mechanism to fit a variety of handlebars. Full flat design maximizes mounting space.

ZETA

ADJUSTABLE MOUNTING BRACKET HANDLE BAR TYPE

- Brace type adjustable mounting bar.
- Multiple mobile devices such as phone mount holder and USB power charger can be attached on the handlebar.
- The length can be adjusted in 5 stages by using the special spacer.
- Compatible with various shapes of bar handles.
- The brace shaft has a full flat design with a diameter of 22.2mm to maximize the mounting space.
- Compatible with bar handles without handlebar brace (22.2mm). *1
- High-strength aluminum is used. Sandblasted and black anodized finish.

*1 There is no brace function to increase the rigidity of the handlebar.

Part #	
ZE60-1000	
Color	Black
Size	Length: 258mm/244mm/230mm/216mm/202mm Diameter: 22.2mm
Mountable Range	212mm/198mm/184mm/170mm/156mm
Weight	295g (total length 258mm)
Material	Clamp : Forged aluminum Brace shaft : Aluminum
Surface treatment	Black anodized finish
	Design registration pending

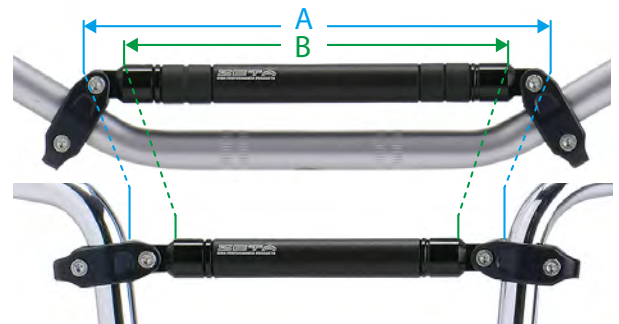

Maximized mounting space

- The brace shaft has a full flat design with a diameter of 22.2mm to maximize the mounting space.
- Multiple mobile devices such as phone mount holder and USB power charger can be attached on the handlebar.
- The length can be adjusted in 5 stages by using the special spacer.
- Compatible with various shapes of handlebar.
- Compatible with bar handles without handlebar brace (22.2mm).

*There is no brace function to increase the rigidity of the handlebar.

Tying up wires

- Harness clip on the clamp allows for tying up wires with out using zip ties.
- Plastic collar on the clamp prevents scratches on the handlebar.

A	B
Brace shaft total length	Mounting space (diameter 22.2mm)
258mm	212mm
244mm	198mm
230mm	184mm
216mm	170mm
202mm	156mm

The brace may become difficult to remove depending on how it is installed and used. It is recommended to apply grease to the brace during installation.

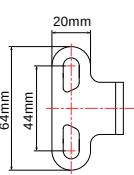

Adjustable and easy to set the best position, Bar mount type mounting bar.

ZETA

ADJUSTABLE MOUNTING BRACKET BAR MOUNT TYPE

- A mounting bar that attaches to handlebar clamps.
- The detailed position adjustment function of each part allows for installation according to the type of mobile device.
- The mount bar can be adjusted back and forth, left and right, allowing the smartphone to be set in the best position for the rider.
- The mounting stay is compatible with handlebar clamps of 22.2mm and 28.6mm in diameter by using the included spacers.
- The main body and mounting bar are made of lightweight, high-strength aluminum.
- The mounting stays and bolts are made of rust-resistant stainless steel.

Part #
ZE60-1020

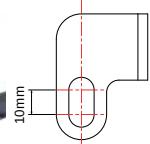

Can be installed in either the left or right mirror hole.
[Please note]
May not be able to be installed on some bikes.

ZETA

ADJUSTABLE MOUNTING BRACKET MIRROR HOLE TYPE

- Mounting bar for 10mm thread diameter mirror holes.
- Each part of the bar has an adjustable function to allow installation on either side.
- The mounting position can be finely adjusted according to the type of smartphone holder.
- The mounting bar can be adjusted back and forth, left and right, to secure the smartphone in the best position for the rider.
- The main body and mounting bar are made of lightweight, high-strength aluminum.
- The mounting stays and bolts are made of rust-resistant stainless steel.

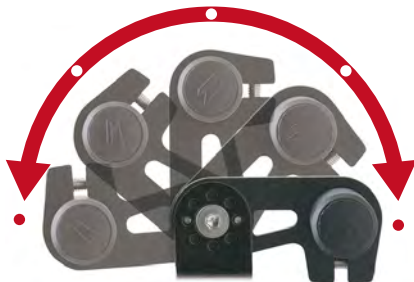

Part #
ZE60-1010

Can be installed in either the left or right mirror hole.
[Please note]
May not be able to be installed on some bikes.

Adjustable and easy to set the best position

Position back and forth or up and down as you like

The 5 position adjustment function allows you to set the position back and forth or up and down as you like. This makes it compatible with various types of smartphone holders and it also allows for detailed position adjustment that was not possible before.

Stepless adjustable bar

Shaped for any left or right side. The 22.2 mm diameter, approximately 110 mm wide mounting bar is steplessly adjustable. The stepless adjustment increases the flexibility of mounting mobile devices.

Mobile devices on the brace too! The most powerful helper to make the position of the mount more flexible

ZETA

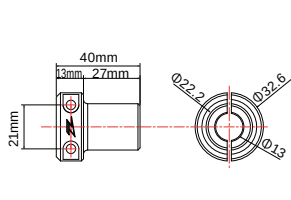

CONVERSION ADAPTER FROM $\phi 13\text{mm}$ TO $\phi 22.2\text{mm}$

- A mounting bar that attaches to the handlebar brace. However, for those who want more freedom and flexibility, we have introduced a compact conversion adapter that is held between two parts of the handlebar brace.
- Compact conversion adapter.
- Easily converts popular off-road handlebar braces with a diameter of 13mm to a common handlebar diameter of 22.2mm.
- Since it is a hold type, it can be attached to non-dissembled type braces and the mounting position can be easily converted.
- The compact design allows for multiple attachments for greater flexibility and ease of use.
- The high quality finish of CNC machined aluminum creates a sense of luxury that goes beyond the realm of just a convenient item.
- Can be installed on any bar with a diameter of 13mm. Converts diameter to 22mm.
- Easy to change the mounting position.
- The compact design allows for multiple installation.

[When used with bar pad]
- ZETA Mini Bar Pad (ZE47-9232)
- Renthal bar pad 8.5 inches

The above items and this product can be used together as long as there is one of each.

Part #
ZE60-1050

[Please note]
- The bar pad may not be used depending on the size.
- The brace may not be 22.2mm in diameter due to measurement error in the brace diameter.

[Compatible Handlebars]
- ZETA COMP Handlebar
- ZETA CX Handlebar
- Renthal handlebar 7/8"

Includes
Mounting Kit

Unique connection part of the guard and the bar end adapter prevents problems such as the guard rotating when receiving a shock.

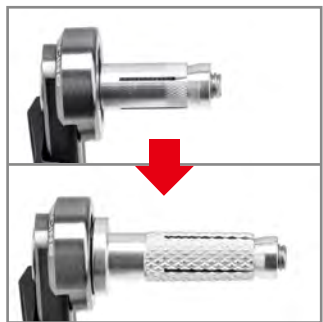

Durable plastic bumper as standard equipment.

CNC machined to match the shape of the Armor handguard for integrated design. R-processing reduces the risk of injury.

Prevents sand and other contaminants from entering the throttle tube when tipping over. The diameter is set to 32 mm, the same as the outer diameter of the grip tip, to reduce tip tear.

[Armor Handguard Bend / Armor Handguard Straight]
By replacing the bar-end adapter with the adapter (Part No. ZE71-8921) for Pro Armor handguard, it can be fixed more firmly.
*Only compatible with aluminum handlebars.

Shaped to fit the adapter (Part No. ZE71-8921) for Pro Armor handguard

ZETA

PRO ARMOR HAND GUARD

- Upgraded armor hand guards for pro rider use.
- Comes with durable plastic bumpers to protect the armor hand guard body.
- Comes with durable longer bar end adapters which holds the handlebars tighter.
- Matching design between hand guard body and bar end adapter prevents rotation of hand guards in the event of a fall.
- Can be used with Zeta hand guard mount kits: side, front and BC type, for durable fitting.
- Available in Titanium, black and orange anodized colors.
- Replacement hand guard bumpers and bar end adapters are available.

ANTLER HAND GUARD

- Made from high quality, durable and lightweight polyamide material.
- Multi-position mount allows guard to mount without interfering with natural handlebar flex, helping to reduce arm fatigue.
- Designed to be used with our entire line of Armor Hand Guards Protector.
- All kinds of armor guard series protector can be installed.
- Can be used on 22.2 mm and 28.6 mm handlebars.
- **Inner diameter of 13.5 mm to 16 mm**

Part #

[ZE73-1001](#)

* When installing on trail models, ensure there is adequate space between the switches.

* This 100% polyamide guard contains no metals.

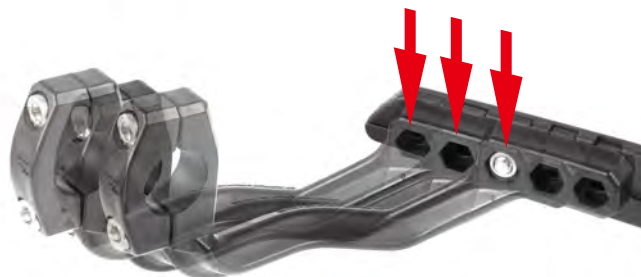

* Cannot be mounted using the X3 mount stay

KEEP HANDLEBAR FLEX

Made of TPU with excellent impact resistance. Balance between rigidity and flexibility. Delivers stable performance even at low temperatures. By curving the shape of the grip end part, it does not interfere with the "door knob grip" when tilting or holding down.

MOUNTING POSITION

"Made of TPU mount stay has a shape that avoids brake hoses and wires. The tip position can be selected from three mounting positions. Both standard diameter bar (22.2 mm) and large diameter bar (28.6 mm) are supported. W adaptive diameter: 22.2mm-23.5mm"

ALUMINUM BAR END PLUG

The high-strength aluminum bar end and 3mm-thick spacer protects the guard body from falls and other shocks are lightweight and strong. Compatible with aluminum handlebars with an inner diameter of 13.5 mm to 16 mm.

PROTECTOR

An optional armor hand guard protector can be attached.
(Scudo protector cannot be installed)

HANDGUARD

A long type U clamp is designed to largely avoid brake hoses, banjos and wires. When mounting on a handlebar with braces, check for a U clamp mounting space.

Two types of bar end spacers are included to prevent lever interference and to fine-adjust the installation.

The spacers provide more space between guard and throttle and switch boxes. You do not need to relocate them on your handlebar, keep them at the stock position.

All protectors for armor guards can be attached.

Black

Ti-Color

CROSS CUB110

A long type U clamp is used to largely avoid brake hoses, banjos, and wires.

Includes Mounting Kit

ZETA ADVENTURE ARMOR HAND GUARD

- High grade aluminum made handguard that fit large bending angle and short handlebar, especially adventure tourer bike and dual sport bike.
- The overall short length of the body reduces interference with the cowl / screen or meter, and a selected flat head bolt on the connecting portion with the U-clamp further reduces interference with the screen.
- Spacers are included to avoid interference with the end of the lever and to adjust the position of the guard body.
- All protectors for armor guards can be attached.
- Inner diameter 13.5 to 19mm for $\phi 22.2$ mm Handlebar.

GU HAND WARMER

ZETA

CW HAND WARMER

- Hand warmer designed for hand guard.
- Prevents your hands from freezing in the cold wind of deep winter.
- The main fabric is tough and durable 300 D oxford fabric with water repellent treatment on outside and PVC coating on inside to make it cold and water resistant.
- Cuff part made of soft and elastic Neoprene fabric to retain fine mobility.
- Inside pocket ideal for tiny such as instant heat pad is included.

*Please check for that there is no interference with operability of each parts before use.

Easy installation without tools!

Made of High-strength ballistic fabric!

Material	Wrist Opening: Neoprene
	Body: Ballistic polyester (black)
	Body: Carbon look PVC leather (Carbon)

**It can be use for
both touring and dirt riding.**

The two flaps can be adjusted to accommodate different positions.

Dirt Riding

Wide wrist adjustment allows for better handling and does not interfere with riding in the dirt. In the event of an unexpected fall, it is easy to remove your hands from the hand warmer for safe riding."

Touring

Narrow wrist adjustment prevents running wind from entering the hand warmer, improving cold and wind resistance.

Velcro wrist opening adjustment.

When touring, the wrist opening can be adjusted narrower to prevent the wind from entering the hand warmer and improves the protection against cold and wind. The large size L can narrow the outside of the wrist opening more than the size M. The capability makes it ideal for long hours of touring. When riding in the dirt, the wrist opening can be adjusted wider to improve maneuverability and not interfere with riding. In the event of an unexpected fall, it is easy to remove your hands from the hand warmer and ride safely.

Save space around switches.

The space around the switches is designed for ease of operation. The wrist opening can be adjusted with a velcro system to make it larger or narrower. Be sure to check that there is no interference with each move before use.

Easy handling even when standing ride.

The wrist area is made of flexible neoprene fabric. Minimizes impact on riding position and provides both ease of movement and thermal protection.

Reflectors

Reflectors are equipped on the front and sides of the cover to increase visibility when riding at night.

Convenient inside pocket

Inside pocket, good to put a tiny items such as instant heat pad, small purse and cards.

Master Cylinder Guard

2 adjustable master cylinder guard positions to protect your master cylinder. It can be removed for lighter weight.

Master cylinder guard

Hand guard without guard.

Handguard Mount TYPE-2

Clamp on style universal hand guard mounts, made of light weight plastic.

Comes with special hand guard mount spacers.

3 hand guard mounting positions.

Clamp Position

Left

Right

Hand guard mount is designed to install hand guard mount inside of switches or brake / clutch master cylinder on handlebar without any position adjustment on handlebar. Great for use on recent MX bikes that comes with mapping switch and electric start button, which do not have space on handlebar straight area.

Handlebar Clamp

Can even be mounted on handlebar curved area.

* Can be used on taper handlebar size from 22.2 mm to 23.5 mm.

Mount Spacer

Adjust hand guard angle with mounting spacer when hand guard clamp is installed on handlebar curved area.

Standard 0°

Slant 10°

Turn over spacers to change hand guard angle.

DURABLE CHAIN GUIDE

- 6 mm thick high strength aluminum chain guide with added chain drop prevention function.
- Up to 50 teeth rear sprockets. *When the guide block is installed.

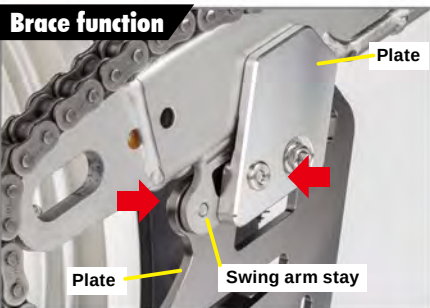

Plate: Material 7000 grade CNC machined aluminum

Block: Polymer material

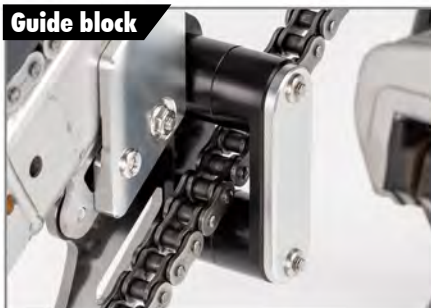

Weight: 410g

Bike	Year	Color	Part #
SEROW250/XT250	05-20	Black	ZE82-2301
Tricker	04-18		

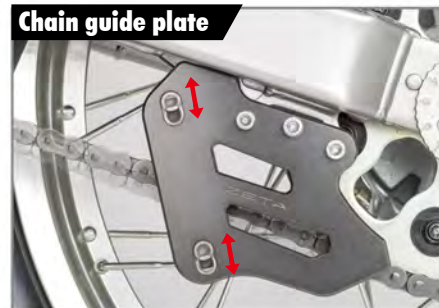

Bike	Year	Color	Part #
SEROW250/XT250	05-20	Ti-color	ZE82-2308
Tricker	04-18		

With brace function to prevent the swing arm stay from bending inward from side impact. Strongly protects the chain from falls and rocks.

Prevents flapping of the chain. Power loss is minimized by adopting polymer material with low friction resistance.

The guide block can be adjusted up and down, matching the sprocket size and the chain play.

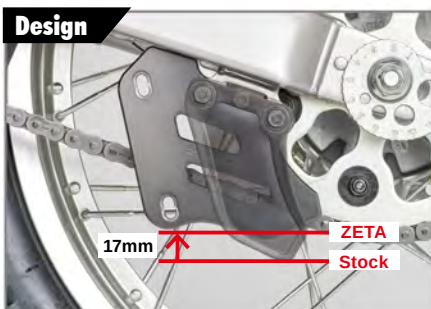

ZETA

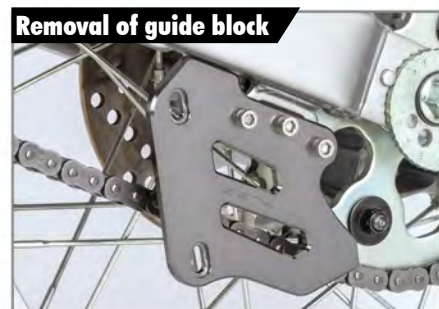

DURABLE CHAIN GUIDE Replacement Chain Guide Block

Part #

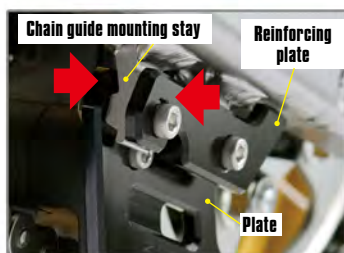

[ZE82-2911](#)

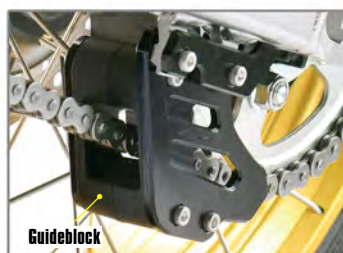

Despite the sturdy design, the minimum ground clearance is +17mm compared to stock. Reduce the risk of contact with obstacles.

Can be used even without the guide block avoiding excessive wear in situations where guide performance is not required.

Chain guide mounting stay
Reinforcing plate prevents damage to the swingarm's chain guide mounting stay in the event of a strong impact.

Guide block:
Prevents the chain from falling off and flopping around. Made of PU with low friction resistance to minimize power loss.

Removable guide block:
The easily removable guide block can be removed for street riding with less chain flapping.

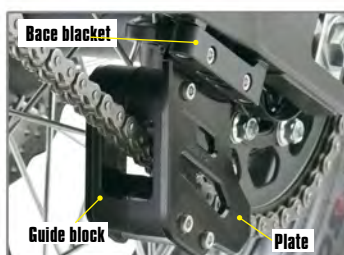

ZETRA

DURABLE CHAIN GUIDE CRF1100L Africa Twin

- High strength chain guide with 6 mm thick aluminum on the main plate.
- Brace function prevents damage to the chain guide stay. Equipped with a guide block to prevent the chain from falling off.
- The guide block prevents the chain from flapping and improves off-road riding performance.
- Prevents hands and boots in the event of a fall.
- Suitable for both street and off-road riding.
- Replacement guide blocks are also available.

Part #	Color
ZE82-2001	Black

Installation of the chain guide:
Mount the base bracket directly to the swingarm to secure the chain guide in place.

Guide block:
Prevents the chain from falling off and flopping around. Made of PU with low friction resistance to minimize power loss.

ZETRA

DURABLE CHAIN GUIDE TENERE 700

- Bolt on chain guide for Tenere 700 for more off-road ride.
- Prevent chain falling off from the sprocket even in hard off-road riding.
- 6 mm thick high-strength aluminum alloy chain guide body with a durable plastic guide block.
- Includes a high-rigidity aluminum stay that resists impact.
- Available replacement plastic guide.

CHAIN GUIDE

- Chain guide composed of TPU, excellent in wear resistance and restorability and duralumin plate with CNC processing.
- Reduce the load on the swing arm attachment stay by using TPU material that is durable against impact and wear.
- 3D design slider reduces the impact of the debris coming from all directions.
- Maintains its guiding performance that requires rigidity by a duralumin plate designed exclusively for the model.

- * Please apply removable low to medium strength screw lock for installation.
- * Please check the slider wear periodically.
- * In the case of trail models, guiding performance is enhanced as much as racers.

Angles in the front avoid the impact, and the sleek 3D design reduces the catching and damage risk.

Its elastic structure avoids interference trouble with sprocket, compared to one made of aluminum when catching the debris.

The insert nut is used on the back. Eliminating protruding bolts and nuts, smooth head shape reduces catch during tire change.

The slider bottom has a reduced contact area in consideration to the ground clearance.

REPLACEMENT CHAIN GUIDE BLOCK

Part #
ZE82-1900 Color
Black

*Replacement.
The slider covers all line-up model.

1 The range of change of the number of the rear sprocket teeth is less than that of the stock chain guide. When the number of teeth is increased, the position of the chain adjuster may move forward, causing interference.

2 Since the guide performance is improved as much as the racer, the range of change of the number of rear sprocket teeth is less than the stock. If the position of the chain adjuster is large and forward when the number of chains is increased, it may interfere.

Maximum teeth
CRF250L / M, CRF250RALLY: 45,
WR250R / X: 48, KLX230: 4

3 Depending on the position of the chain adjuster, the end of the guide block may interfere with the hub. The adjuster must be adjusted or the guide block must be cut to prevent interference.

Wider guard area than stock, 5mm thick for extreme durability

ZETA

ED SKID PLATE HD TENERE700

- Strongly guards the lower part of the engine from stones and obstacles.
- Prevents problems caused by breakage and covers a wide range from touring to heavy riding.
- Strong 5000 series aluminum is used to extensively guard the generator case and water pump.
- It is installed securely to the bike and resists impacts from below.

Part #	Bike
ZE55-2480	TENERE US '20-21
	TENERE EU '20

Can be used with ZETA EX Pipe Guard (ZE52-2841)

In addition to the stock installation position, it is firmly set to the frame (rear suspension link) with brackets.

It can be used with a center stand without any modification for easy maintenance.

Linkage Guard (ZE55-4010) (sold separately).
Drilled mounting holes for the linkage guard.

ZETA

LINKAGE GUARD

- Universal rear suspension linkage guard.
- Made of durable and thick polyethylene to protect linkage from being hit with rock and stones.
- Attach this guard to OE skid plate or your aftermarket skid plate.
- Drill holes on your OE skid plate or aftermarket skid plate to attach.
- Comes with mounting hardware, bolts, nuts and washers.

Installation is simple and easy, similar installation to stock ducts.
Stylish design with stainless steel mesh embedded in the intake.

- 1 Drain holes are placed at the bottom to prevent rainwater from pooling inside the conversion duct.
- 2 The indentation next to the drain hole allows access to the duct cover bolts without removing the product.

Operation is maximized when the optional DRC Compact Carrier CT125 (Part No. D60-10-021) is installed

ZETA ZETA CONVERSIONDUCT for CT125/TRAIL125

- Ducts for a clean appearance and stylish looks.
- Easy installation by simply replacing the factory ducts.
- It doesn't interfere with the carrier when changing the carrier.

**Grab it tough and hold on to, the unique "VA-S" function reduces shock and vibration.
Set of Tough Lock shields to protect from flying debris and sunlight**

TOUGH LOCK

ZETA

TOUGH LOCK Mobile Phone Mount

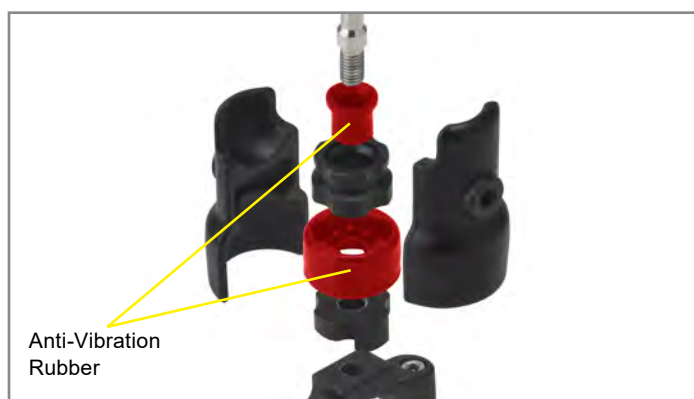

- The set includes the "Tough Lock" smartphone mount, CNC machined for high precision, and a shield to protect the smartphone from flying objects while riding.
- High rigidity to withstand hard riding.
- Equipped with our original rubber mounting system "VA-S".
- The VA-S system reduces the risk of damage to the smartphone by mitigating the impact of tipping over and vibrations while riding.
- Easy one-handed attaching, removal, and locking of the smartphone.

YOUTUBE

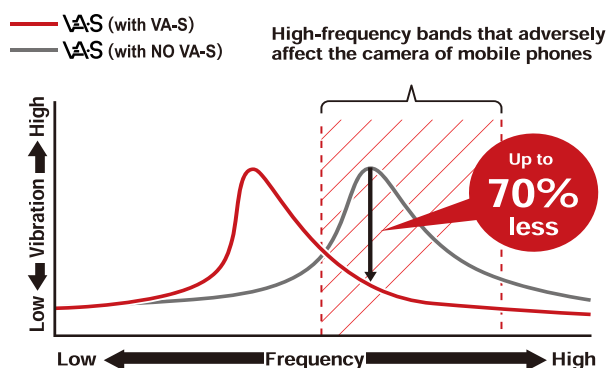

What is VA-S (Vibration Absorber-System) ?

Specially shaped anti-vibration rubber is built into the main body. The rubber mount structure reduces the risk of damage to the smartphone camera by vibrations and shocks from the motorcycle to the smartphone.

When a large force is applied, such as a fall, the rubber mount part rotates to divert the impact and reduce the risk of damage to the smartphone body.

[Vibration Test Results]

Reduced vibrations (high-frequency band) specifically to motorcycles adversely affecting the camera of the smartphone. Effectively reducing the risk of malfunction.

This product does not avoid the failure of all smartphones. If damage has already been accumulated, this product may cause malfunctions.

*This product does not avoid the failure of all mobile phone. If damage has already been accumulated, this product may cause malfunctions.

 Shield attaching stepped spacer x 1 pc

CNC machined

The mount is made of high-strength aluminum machined in detail by CNC machining to provide high precision and linear operation.

Anodizing improves corrosion and wear resistance.

Mounting arm holds smartphone firmly

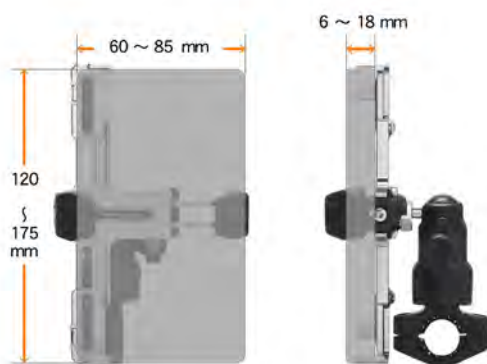

Plastic arm that can hold a smartphone firmly in place. The material used is a flexible plastic (TPU), which can be used to hold the smartphone in place without damaging the main body of the smartphone.

The inner surface is concave to prevent interference with the smartphone switch.

Ball mount allows for greater freedom of multiple adjustment

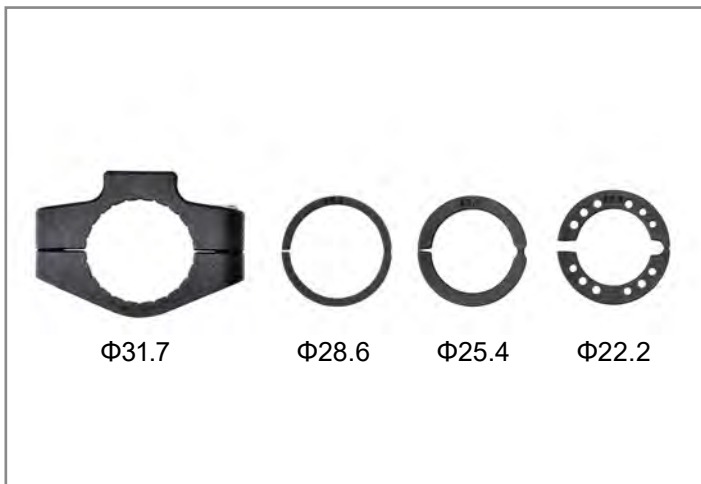

The ball mount allows the smartphone to be adjusted to any angle and orientation.

Compatible with various handlebar diameters

By using the included plastic spacer to the clamp portion, it can be used with handlebar diameters of 22.2mm, 25.4mm, and 28.6mm. When the spacer is not used, the handlebar diameter is 22.2mm, 25.4mm, and 28.6mm.

The handlebar diameter of 31.7mm, which is partially used on Harley, BMW, etc., can be used.

Compatible with various handlebar diameters

When the spacer is not used, the handlebar diameter is 22.2mm, 25.4mm, and 28.6mm. The handlebar diameter of 31.7mm, which is partially used on Harley, BMW, etc., can be used.

Optional shield

Used in combination with the optional shield, protects the smartphone from flying rocks and insects. It also serves as a sunshade and improves the visibility of the smartphone screen. In addition, it suppresses the rise in temperature of the smartphone body due to sunlight. Tough Lock Smartphone Mount Shield Set is also available. *When using the shield together, the smartphone can only be mounted horizontally.

Compatible with almost all models when used in combination with other products

Can be installed on various vehicles by using with ZETA Adjustable Mounting Bar Series or DRC Smartphone Bar Mount.

EXPLORER WINDSHIELD

ZETA

EXPLORER WINDSHIELD

- Bolt on design to any handlebar.
- Standard mounting bar for mounting mobile devices.
- Shield tilt angle and height are infinitely adjustable.
- Highly customizable, easily positioned to suit the bike and rider's physique.

Infinitely adjustable angle and height

The angle of the arm and the angle of the screen can be adjusted, allowing for fine-tuned settings according to preference.

Arm design adjustable to fit the bike

Can be mounted in a position that does not interfere with meter visibility or key cylinder access. Also prevents interference with wires.

Mounting bar for mobile devices

22.2mm diameter mounting bar for mounting mobile devices. A wide range of devices, including smartphone holders and USB power supplies can be mounted.

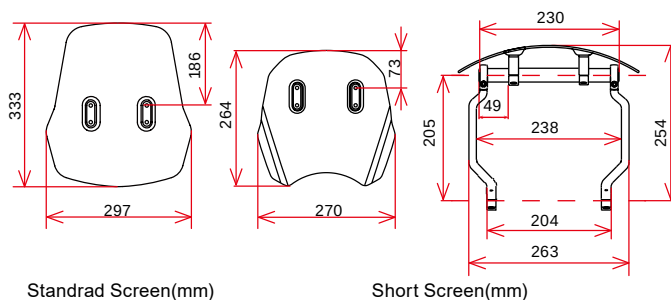

Standard screen can be flipped up or down as desired

The windproof standard screen can be mounted upside down. This allows you to adjust your field of vision and choose your preferred styling. The short screen cannot be mounted upside down.

ADV Wind Series options can be installed

Replacement screens, Optional large screen, Optional extension mounting bar Replacement screen bolt set

[Warning]
Please note the astrigent phenomenon.
Do not park the car in a condition where sunlight shines directly on the inside of the screen from the rear of the bike.
The astrigent phenomenon may cause the screen to accumulate heat and ignite.

The screen has a large adjustment range and wind resistance varies depending on the setting.
After installation, please be sure to take a test run to confirm that there are no problems with the steering wheel operation.

Control the mud, win the race!

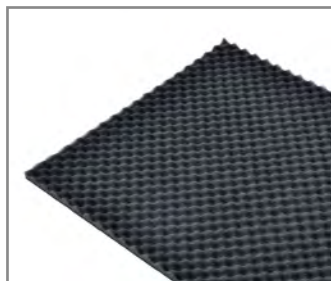

ZETA

FENDER MAT

- Mounted on the backside of the fenders to minimize mud adhesion during muddy riding.
- Preventing an increase in bike weight ensures a stable ride and reduces rider fatigue.
- The material is a special lightweight sponge with low water content and high elasticity.
- It is used in motocross, enduro, and other races.
- Universal size for all makes and models.
- 2 pics set.

Part #	ZE55-5001
Size	Length 980mm x Width 300mm x Thickness 11mm
Material	Lightweight sponge Conforms to European RoHS, SOC and other environmentally hazardous substance standards

Special sponge, which is resistant to water and has a high recovery rate of over 90%, and is processed into a convex and concave shape, to prevent mud from sticking to it.

A slit in the center of the release paper facilitates positioning when mounting.

Mud does not adhere easily and the bike weight increase is minimal, so there is no need to make major changes to the suspension settings.

Comparison Results

A 30-minute test in muddy conditions showed a difference of approximately 23 kg between vehicles equipped with the product and those not equipped with it.

Big help on touring.

ZETA

GRAB BAR

- Tandem use grab bar specially designed for each model.
- Also useful for securing touring bags and belts to secure in a van.
- Black anodized finish with laser printed logo.

#1 Cannot be installed on ABS vehicles.

ZETA

PRO FRONT DISC GUARD

- Developed with factory Kawasaki racing team and Yamaha racing team in Japan, and used on their race bikes.
- Protect your front disc and brake caliper from rocks, bushes and debris during your ride.
- 270 mm disc guard size accepts most dirt bike's front brake disc.
- Model specific mount kit is required to install the disc guards on your bike.
- Available black and white color.

Part #	Color
ZE52-1041	Black
ZE52-1046	White

*Disc guard mount sold separately

ZETA

FRONT DISC GUARD MOUNTING KIT

- Model specific mounting kit. (Required for disc guard installation.)
- Mount bracket is integrated with wheel spacer.
- Comes with disc guard mounting stainless bolts.

Aluminum sleeve

ZETA

LAUNCH CONTROL

- A hinge style aluminum clamp body for easy installation.
- The front fork does not need to be removed to install this kit.
- Comes with clamp body and integral lower fork guard. One side only.
- Hinge pin is constructed of high strength Ti-6AL-4V titanium.
- Nylon sleeve prevents front fork scratches.
- Light weight 7075-T6 aluminum lock pin.
- The integration of the lower fork guards and lock pin unit creates a rigid light weight body.
- Currently not available in the US.

* Usable front fork diameter is 53 mm to 56 mm

Usable front fork size is up to 57.5 mm without using nylon sleeve.

FORGED ALUMINUM KICKSTAND

Comparison when lowdowned

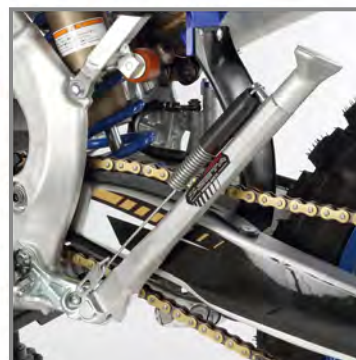

STOCK STAND

FORGED ALUMINIUM KICK STAND

YZ250FX

ZETA

FORGED ALUMINUM KICK STAND

- Lines up with 25 mm shorter than the stock. (Some models have high lift standards.)
- Avoids an unstable bike even during changing of the bike height. Can also be used safely on rough roads by selecting the OPTION TIP.
- A2014 aluminum is used, to maintain strength and durability.

* The inclination varies depending on the model. If the length of the TIP does not work well, see the OPTION TIP conversion table below and change the TIP.

REVOLVER SHIFT

Monkey 125

Remove shift linkage and install this shift lever, provide more secure and direct shifting.

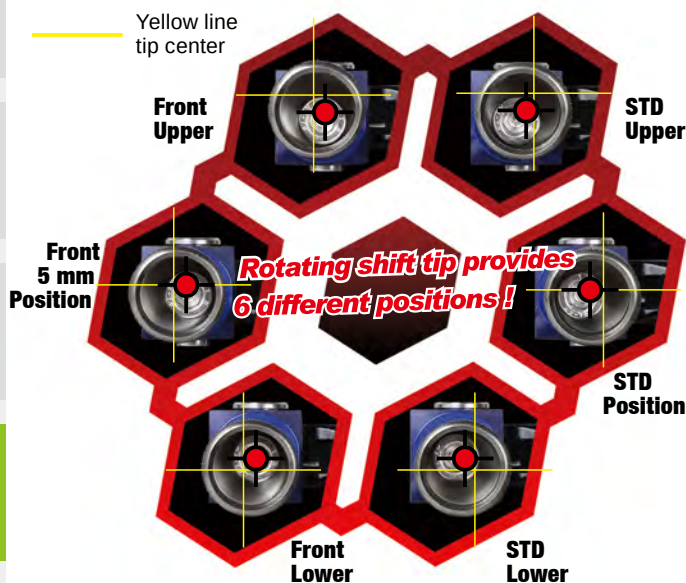

* Neutral position will be sensitive.

ZETA

REVOLVER SHIFT LEVER

- Revolving adjustable shift tip design provides 6 different positions to suit most riders.
- Rotating shift tip provides 6 different positions, offers a more sensitive shift position adjustment.
- Shift arm is made of A2014 forged aluminum for durability.
- Forged arm is anodized black with ZETA laser print logo.
- Foldable shift tip is made of CNC aluminum with knurled finish for better shift grip.
- Shift tip is color anodized with ZETA laser print logo.
- Replacement shift tips and tip mounts are available.

NOTE : After selecting the desired tip position, apply a thread Locking agent and tighten firmly.

Replacement Tip Mount

Part #	Color	Description
ZE90-3900	Black	Straight type
ZE90-3902	Red	
ZE90-3906	Blue	
ZE90-3912	Red	Offset type
ZE90-3913	Orange	
ZE90-3916	Blue	
ZE90-3919	H-Blue	

NOTE: When replacing the tip mount, be sure to use the same type as shown on the compatibility table. If you install the incorrect type, it may interfere with the engine case cover.

TRIGGER BRAKE PEDAL

- Brake arm is made of forged A2014 aluminum for durability.
- Black anodized finish with laser print logo.
- Made of CNC machined 7000 grade aluminum.
- Bolt, pin and spring are made of stainless steel for less corrosion.
- Comes with brake saver.

ZE90-7082
CRF1000L Africa twin

Black anodized finish with laser print logo.

Thin tip design to prevent it from hitting the ground. Designed to prevent sand and mud from entering the tip folding area from front and side of brake tips. Pins are designed for sensitive pedal control and traction.

Designed to prevent sand and mud from entering tip folding area from front and side of brake tips.

Provides 2 different positions.

FRONT FORK TOP CAP

- Made of CNC machined 7000 grade aluminum, durable and light weight design.
- Top cap integrated damping adjuster allows you to adjust damping ratio without any tools, quick and easy to adjust.
- Integrated air bleeder on top cap provides more space, no need to worry about air bleeder breakage by hitting handlebar.

FRONT FORK TOP CAP INITIAL ADJUSTER

- Allows to adjustment of the front suspension preload.
- The preload adjustment range is set from -5mm to +10mm, and it supports various situations such as a light weight rider or trail rider.
- An air bleeder is equipped to release pressure in the suspension without special tools.
- Setting initial preload to the spring is to reduce (Nose dive) spring bottoming out by heavy braking.
- 1 set for left and right.

The internal pressure of the front fork can be released and adjusted by hand while riding!

ZETRA
WP

ZETRA
SHOWA/KYB

ZETRA **AIR BLEED KIT**

- This air bleed kit allows you to vent the pressure that builds up due to heat changes inside the fork during long runs such as enduro races with a single push while riding.
 - The clamp can be attached to the stock lever holder on either the brake or clutch side.
 - The nylon sleeve on the inside of the clamp reduces the risk of lever damage by allowing the lever holder to rotate in the event of a strong impact during a fall.
 - Air hoses and one-touch joints are included to connect to the left and right front fork air bleeds.
- Compatible with KYB, SHOWA and WP.
Cannot be installed on MAGURA hinge type.

Part #	SUSPENSION
ZE91-1201	SHOWA/KYB
ZE91-1202	WP

Clamp: Can be mounted on either the right side (brake) or left side (clutch).
Sponge filter: The air outlet is equipped with a filter which prevents dust from entering.

ZETRA **REPLACEMENT FILTER SET**

Part #	Set
ZE91-1210	3 pcs

ZETRA **FRONT FORK AIR VALVE CAP SCREWS**

- Replacement front fork air valve cap screws.
- Made of aluminum, available in anodized red, blue, orange and husqvarna blue. Comes in pairs.
- Available KYB, SHOWA and WP caps.
- WP cap is slotted head, no need for torx head driver for removing air valve bolt anymore.

Part #	Size
ZE56-11002	KYB/SHOWA Red
ZE56-11006	KYB/SHOWA Blue
ZE56-11012	WP Red
ZE56-11013	WP Orange

ZETA FRONT SUSPENSION LOWERING INNER KIT

- Front fork lowering inner kit for KYB, SHOWA and WP front fork suspensions.
- Replace front fork inner parts with this kit. It provides 30 mm and 50 mm lower height.
- Replacing SHOWA and WP front fork spring seat and fits inner collar to make your suspension 30 mm lower than stock height.
- Make front fork fully extended length shorter, but no change in length when the fork is shortened.
- Keep clearance between wheel and under fender, even on lowering.

ZETA FREE PISTON for KYB Twin Chamber

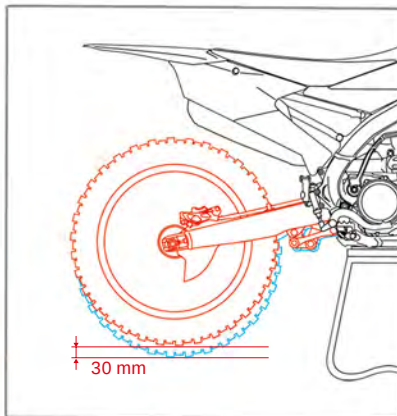

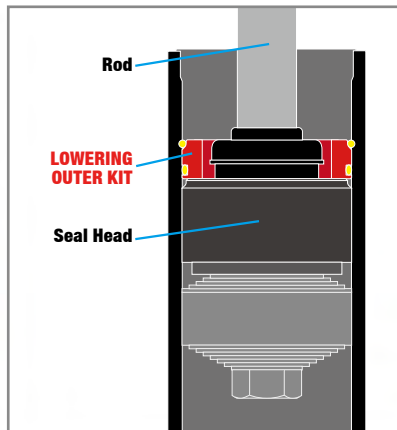

- Replacement free piston kit for KYB AOS (Twin chamber) front forks.
- Made of light weight aluminum, more durable than OE free piston.
- Great to use for enduro racing (LT model).
- Suspension stiffness can be changed, and to provide progressive suspension feel by changing oil level.

Part #	Size	Description
ZE56-40010	STD	Provides OE suspension feeling.
ZE56-40010	LT	Light weight and less friction design, provides soften and smooth front fork moving.

ZETA REAR SUSPENSION LOWERING OUTER KIT

- Lower your rear suspension without disassembling the rear shock unit.
- Push down seal head from outside of damper, and install this kit to lower your suspension 30 mm while keeping its function.
- Make the rear suspension's fully extended length shorter, but not change length when the shock is shortened. Keep clearance between wheel and under fender even upon lowering.
- Can be used with lowering link.
- Available in 46 mm size for KYB / WP and 50 mm size for KYB / SHOWA / WP rear suspension.

Part #	Description	Size	Color
ZE56-32246	KYB / WP	46mm	Blue
ZE56-32250	SHOWA / KYB / WP	50mm	Red

ADJUSTABLE LOWERING LINK KIT

- Adjustable seat height by rotating the attachment to change link rod length.
(Reference : About + 5 mm ~ - 25 mm. Vary by models.)
- Also adjustable operation of the rear suspension according to the situation, such as off-road course by changing the lever link ratio.
- 5 clips to lower. A standard position and 1 clip to lift up. Total 7 clips range adjustment.
- Bolt on design, pre-installed bearings and dust seal, only changing a stock link rod.
- Made of 7000 grade CNC machined aluminum with anodized finish and ZETA laser printed logo.

ZETA

LOWERING LINK KIT

- Provides lower seat height.
- Bolt on design, easy to install, just replace to this linkage to make your seat height around 30mm lower.
- Made of 7000 grade CNC machined aluminum with anodized finish and ZETA laser printed logo.
- Available for many models includes KTM and Husqvarna.

ZETA REAR SUSPENSION

REARSHOCK PRELOAD ADJUSTER Exchange Type

- Simply by replacing the stock locknut and spring seat, the difficult preload adjustment is made easier.
- Instead of the locknut method, the band method used by WP and other companies can be used.
- The lock nut can be locked and unlocked with a 5mm hex wrench.
- No need to repeatedly tap in the spring when adjusting the preload, and easy to adjust by simply turning the spring part by hand even when it is attached to the bike body.

Part #	Color
ZE56-13016	Blue
ZE56-13026	Blue
ZE56-13032	Red

[Caution]

Some suspensions may require disassembly for installation.
Some rear shocks with short thread length of the shock body itself may limit the preload adjustment range.

ZETA REAR SUSPENSION

REARSHOCK PRELOAD ADJUSTER Joint Type

- Simply insert it between the stock spring seat and spring for improving work efficiency.
- Even in a bike where access to the rear shock is difficult, adjustment can be easily made by simply turning the spring part by hand without using special tools.
- Facilitates difficult preload adjustment without damaging the plastic spring seat.

WP REAR SUSPENSION GAS VALVE

- WP made rear shock sub tank gas sealed valve conversion adapter (Schrader type).
- Allows Nitrogen gas fitting through a universal schrader valve without WP special tools.
- By adding the prevent-falling design, the reliability is improved.
- Lineup of two types: Dent and Flat.

ZE56-51058 Dent type

ZE56-51064 Flat type

BUMP RUBBER HOLDER

- Rear suspension bump rubber holder for KTM / HUSQVARNA 85 cc.
- Make your bump rubber have a longer life than OEM rubber holder due to the special bump rubber holding cup design.
- CNC machined aluminum with orange anodized finish.

* Disassembling shock unit is required for installation.

FRONT FORK BOTTOM ADJUSTER

- It allows the adjuster to adjust on the bottom of the front fork without using a tool.
- Just pinch and turn. It relieves the stress job "turning and adjusting with a flat tip screwdriver".
- Click feeling allows easy adjustment of front fork suspension bottom adjuster.
- Easy to install, just replace OEM bottom adjuster bolt to our kit.
- CNC machined from high grade aluminum for extreme durability.
- Black anodized body and red anodized adjuster knob.

[Note] Assemble the front spring so that the marking is on the lower side.

ZETA

ED PROGRESSIVE SPRING

- A spring with progressive characteristics for enduro.
- The standard spring has a characteristic that the load linearly stiffens in proportion to the amount the suspension sinks, whereas the progressive spring has a characteristic that it is soft when it starts to sink and strong when it sinks deeply.
- With a small gap, the suspension moves well and absorbs well, so there is less strain on the body and the center of gravity when driving is lower, allowing stable cornering.
- It is difficult to hit the bottom when a large impact such as when passing a large gap or landing a jump.
- In addition, since the beginning of compressing is soft, foot contact is also improved.

Model: Height 173 cm, Weight 58 kg

Front: ZETA Lowdown inner kit (-30mm) + ED soft spring built-in Fork protrusion amount set to maximum.

Rear: ZETA Lowdown inner kit (-30mm) + ZETA lowering link (-28mm) + ED soft spring already installed

[Note] Assemble the front spring so that the marking is on the lower side.

ZETA

ED SHOCK SPRING ENDURO SOFT

- Ideal for YZ250FX/450FX users who feel that the normal suspension is hard.
- Since the stock option parts do not have soft springs set, they can be used as setting parts for hard road surfaces such as scree.
- In addition, the suspension tends to be compressed, so it provides a low-down effect.

FRONT FORK LOWDOWN SPRING for TENERE700

- Front fork spring with progressive characteristic for touring on Tenere700.
- Exchanging with the stock springs lowers the seat height for better ground touching.
- Spring rate is adjusted to minimize the risk of bottom out even with the less amount of travel.
- Using with DRC lowering link kit let you ride with the comfort stock seat wit 40mm lower height.

Compatible with YAMAHA optional lowering link plate (-18mm) as well

STD
(Yellow Line)

**Seat height will
be 40mm lower.**
(Red Line)

[Instruction for reference]

In case of using with DRC lowering link kit (D46-01-238), the link kit lowers the seat height 40mm the front forks sticks out 10mm upward with the lowering springs installed which creates a good balance between the front and rear.

In case of using with YAMAHA optional lowering link plates, the link plates lowers the seat height 18mm and the front fork does not stick out of the top end of the outer tube. Installing lowering springs creates a fine balance between front and rear.

**Actual seat lowering amount will be different for every riders,
the amount sticking out needs to be adjusted.**

LOWDOWN SPRING for CT125 JP

- Lowdown spring for CT125 Hunter Cub.
- By replacing the springs lower the height by about 20mm.*1
- Three different spring rates provides soft at the beginning of compressing and strong when deeply compressing.
- This improves reaching the ground with feet without losing its performance.
- The performance will work for shorter riders in city use.
- The stock stand can be used.
- The front spring can be easily replaced by simply removing the fork top cap.*2

[Attention]

Assemble with the narrower side facing up.

Spring	Part #
Front	ZE56-9331
Rear	ZE56-9431

Seat position

Stock

Lowered

The actual amount of lowering will be affected by body weight.

*1 When a rider weighing 70kg rides the bike, it is lowered about 20mm. The actual amount of lowering will be affected by the rider's weight.

*2 Since the front spring has a reduced stroke, adding 15-20ml of fork oil (viscosity: 10w) to each side will provide a smoother suspension effect with less bottoming out.

ZETA

OFF-ROAD SUSPENSION KIT CROSS CUB 110 JP

The front is a high lift specification that increases the stroke amount and overall length by +30 mm by changing to a long type cylinder. A special front spring is set, and the spring rate is changed to 20% higher than the stock one according to the extended stroke amount. Along with this, the effectiveness of the damper is also adjusted to enable smooth movement with a long stroke, improve road followability on dirt roads, and suppress bottom thrust.

- High lift specification that extends the total length by +30 mm by replacing it with a strong rear shock bracket.
- Needle bearing is already installed in the shock mounting part at the bottom of the bracket.
- Since it rotates without resistance compared to the standard rubber bush, it absorbs impact more smoothly without giving unnecessary resistance to the compression and rebound operation of the damper.

SONIC HANDGUARD

Rebel1100 DCT

Bar-end mounting type handguard with an attractive design that can be used in any genre.

ZETA

SONIC HANDGUARD

- A bar-end mounted handguard that can be changed in style to suit various bikes.
- A higher grade of visuals, a high degree of freedom, and a wealth of functions will enhance your motorcycle life.
- General-purpose bar end type compatible with various handlebars and M16/M8 bar end type for Yamaha/Kawasaki models are available.
- Each of the four models is available with or without a polycarbonate protector.
- Replacement parts for each part are common to both left and right, and are sold in sets of one per side.

The arm position is adjustable freely up and down

By loosening the arm bolt, the angle can be adjusted infinitely up and down around the bar end.

The guard angle is adjustable up and down in nine steps.

With the special spacers, the position can be adjusted by 5 degrees per level from the center position, 4 positions above and 4 positions below, for a total of 9 positions.

The arm can be adjusted in two positions.

The grooves on the bar end plug allow the arm to be adjusted in two positions to suit the vehicle.

Knuckle guard

The knuckle guard is made of soft and flexible PU resin. Mitigates impact from the front and prevents damage to the guard body.

Front plate

The front plate with laser-printed logo can be detached to create two different designs. Enjoy a wide range of styling with

- ZS72-2900 ZETA SONIC Handguard
- Optional PC Protector 2Pcs and
- ZETA Armor hand guard protectors.

Removable polycarbonate protector

Removable polycarbonate protector is standard equipment. Enjoy a wide range of styling with ZETA Armor hand guard protectors.

Double-Slide Anchor

The double-slide anchor system enables easy installation and strong attachment at the same time. Includes anchors for steel handlebars (17.5-18.5mm diameter) and aluminum handlebars (13.5-14.5mm diameter). Anchors are included. Can be installed on a wide range of vehicles.

ZS72-2923

Easy to install, stylish handguard that looks great on any bike.

- A stylish handguard that can be styled to fit a variety of bikes.
- Easy installation by simply fixing to the handlebar end.
- No need for complicated work like conventional handguards, yet firmly fixed.
- High-strength aluminum alloy bar ends protect the grips and throttle tubes from accidental falls.
- It is possible to adjust the position freely by adjusting the position infinitely up and down with the handlebar end as the axis, and adjusting the angle up and down in eight steps with the special spacer. It can be adjusted to any position to prevent interference with the vehicle.
- Matte black finish with a laser printed logo on the front plate. You can also attach and remove the optional PC protector of the same series and other ZETA protectors.
- The handguard allows you to freely change the appearance of the image and enjoy the styling of your choice.

PC-KIT

Bar-end mounting type handguard comes with Polycarbonate protector.

- Stylish handguard with polycarbonate (PC) protector as standard equipment.
- Polycarbonate (PC), which is resistant to impact, UV rays, and low / high temperatures, has a simple and stylish design that is used in any style of vehicles.
- Not only does it increase wind resistance, but it also mitigates frontal impact.
- Easy installation by simply fixing to the handlebar end.
- No need for complicated work like conventional handguards. Securely fixed with machined high-strength aluminum alloy bar-end plugs.
- It is possible to adjust the position freely by adjusting the position infinitely up and down with the handlebar end as the axis, and adjusting the angle up and down in eight steps with the special spacer. It can be adjusted to any position to prevent interference with the vehicle.

FLIGHT RD

CLUTCH LEVER PERCH KIT

Titanium M6 bolt

Titanium pivot pin

PVD finish to the surface with high strength and excellent abrasion resistance.

Titanium pin

Titanium M6 bolt

for RACING

Ratio device

ZETA

FLIGHT PERCH RD 4Finger

- Racing Flight clutch perch comes with ratio device.
- Provides 2 different lever ratios, light pulling and accurate clutch control, by changing position of Ratio Device (PAT. 1416268).
- Comes with quick cable adjuster for quick and easy clutch play adjustment, even during the ride.
- Lever bearing for less friction. Fully CNC machined, super light weight design.
- Conforms to FIM and MFJ regulations.
- Available perch comes with clutch switch for street use and without switch for racing use.
- M6 bolts and pivot pins are made of titanium.

Clutch switch

A micro switch with a width of 13.3mm is designed as compactly as possible. The fine adjustable slide sensor arm offers the reaction timing capability. Dust and waterproof ability is IP67 including lead wire.

ACCURATE RATIO

LEVER RATIO 34mm

LIGHT RATIO

LEVER RATIO 32mm

Ratio device PAT. 1416268

Provides 2 different lever ratios, light pulling and accurate clutch control, by changing position of Ratio Device.

Quick clamp system

Hinge style clamp for easy and quick maintenance. Hinge pin is made of titanium alloy.

Folding lever

Lever swings upward in the event of crash and prevents lever breakage.

Vent Holes

Lever body is designed to decrease wind pressure, and in case of a fall, the breaking point is pre-calculated to avoid worst case "DNF".

Lever End Ball

19 mm lever end ball complies to MFJ and FIM regulations.

Lever adjuster bolt

Can be adjust lever position with set screw.

Quick cable adjuster

Large size 1/6 rotating wire adjuster. Easy to adjust clutch play even during the ride.

- Short lever arm for sport riding.
- Available in black and titanium anodized colors.

Application P228-229

Lever arm type

L3WA
R3WA

L3WB
R3WB

FUNCTION

Folding UP / DOWNWARD

Lever swings upward or downward in the event of crash to prevent lever breakage.

Folding FORWARD

Lever swings forward in the event of crash to prevent lever breakage.

CNC Machined lever

Precision CNC machined finish to reduce weight and for better lever control.

Adjust knob

Provides more sensitive lever adjusting positions than OEM levers. (20 lever positions)

PIVOT LEVER SET STREET

- Pivot lever set for sport bike.
- CNC Machined aluminum folding levers.
- The pivot design allows the lever to fold outward to prevent bending or breaking in the event of a crash.
- Made of CNC machined aircraft grade aluminum.
- Available titanium and black anodized colors.

Pivot

Pivot design with return spring allows the lever to fold outward to prevent bending or breaking.

Adjustable

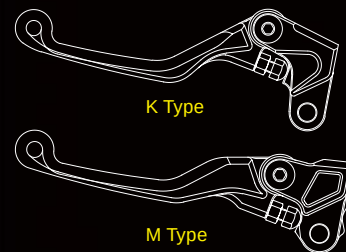

Adjustable reach system provides the perfect lever position for all riders.

CNC Machined lever arm

Machined ZETA logo provides better lever grip.

FLIGHT LEVER GUARD

- Lever guard redesigned for race.
- Polymer lever guard has high strength and excellent flexibility.
- Steel bar ends and inner brackets provide the effect of balancer weights and contribute to vibration countermeasures.
- Installation workability has also improved.
- It is a true race part which does not have the adjustment mechanism with the setting of only the right side.

Part #	Inner diameter
ZS72-1142	14 mm (14 - 15.5 mm)
ZS72-1162	16 mm (16 - 17.5 mm)

LEVER GUARD

- Lever guard prevents accidental brake lever incidents at the race, track day or street riding.
- Made of A7009-T6 aluminum for durable construction, with length adjustable function to fit most bikes.
- Can also be used for clutch lever side by changing the part direction.
- Available Gold and Titanium colors.
- Sold by unit quantity (One side only)
- Can be used for handlebar with inner diameter from 13.5 mm to 19 mm.

Replacement Arm

Parts # ZS72-1094

Ninja 250R, Ninja 250/300

CT125

ZETA

FORK TOP CAP INITIAL ADJUSTER

- Top cap initial adjuster for Ninja 250/300, YZF-R25/R3 and CT125.
- Allows you to adjust spring pre load.
- Pre load adjustable range is -5mm to +10mm, provides pre load setting for racing use and soften for light weight riders.
- Integrated air bleeder, bleeds high pressure air without any tools from the front fork after hard and high speed riding.
- * Ninja 250/300 required to change handlebar to clip on handlebar for installation.

SWING ARM SPOOL

- CNC machined aluminum swing arm spool.
- Can be used with most street racing stands available on the market.
- Available in M6, M8 and M10 bolt sizes to fit most Japanese street bikes.
- Available in titanium and gold colors.
- Comes in pairs.

SWING ARM SPOOL		Gold	Ti-Color
M8	HONDA/SUZUKI	ZS93-1104	ZS93-1108
M6	YAMAHA	ZS93-1404	ZS93-1408

ZETA MAGNETIC DRAIN BOLT

- Magnetic drain bolt for Sport bikes.
- Designed to pick up excess bits of metal in your engine oil.
- Made of 7000 grade aluminum. Light weight design.
- Press fit magnet on the drain plugs.
- Includes safety wire holes to prevent misplaced part.
- Available in blue, red anodized colors.

TITAN

BOLT&NUT SERIES

- High quality light weight titanium bolts, nuts, washers and pivot pins available from ZETA.
- Brake disc bolt kit and sprocket kit available for specific models.
- Made of hot forged Ti-6AL-4V for a durable and extremely light weight product.
- High precision CNC machined bolt and nut head, head size is one size smaller than industrial standard for reduced weight.

Hot forging, CNC machining, thread rolling

ZETA titanium product is designed to be light weight with no decoration. Titanium products are not only machined but also hot forged to provide more tensile strength than material strength.

Bolt and nut are designed with a smaller CNC machined head for a lighter design.

Ti-6AL-4V

ZETA titanium products are made of Ti-6AL-4V.

This chemical notation means this titanium includes 6% aluminum (AL) and 4% vanadium (V). This material is light weight and durable.

It is used in aircraft and space industries, nuclear industry, industrial turbine, race car and motorcycle etc.

Titanium type and strength difference between other material.

Pure Titanium	Lower price than other titanium alloy, great corrosion resistance, but less strength.
Alfa alloy	Great creep resistance and welding work, but bad workability.
Beta alloy	Most durable titanium alloy, easy workability, but high production cost.
Alfa beta alloy	Great durability, ductility, toughness and workability. Zeta Titanium product is made of this material, Ti-6AL-4V.

Titanium Name	Alloy name	Tensile strength
Pure titanium	JIS Grade 1	275-412N / mm ²
Pure titanium	JIS Grade 2	343-510N / mm ²
Pure titanium	JIS Grade 3	481-618N / mm ²
Alfa alloy	Ti-5AL-2.5Sn	850N / mm ²
Alfa-beta alloy	Ti-6AL-4V	900N / mm ²
Beta alloy	Ti-15Mo-5Zr-3Al	1470N / mm ²

Other alloy	Alloy name	Tensile strength
Duralumin	2017-T4	425N / mm ²
Super duralumin	2024-T361	495N / mm ²
Extra super duralumin	7075-T6	481-618N / mm ²
Steel	SS400	400N / mm ²
Carbon steel	S45C	570N / mm ²
Chromium molybdenum steel	SCM435	930N / mm ²

CHAIN ADJUSTER BOLT

- By using titanium bolts the unsprung weight is reduced, and compared to stock bolts, strength is increased and visual appeal is enhanced.
- Nut is designed one size smaller, for reduced weight and compactness.
- And because titanium bolts form a non-conductive coating on the surface, it will not rust.
- M8 is used by the four main Japanese manufacturers of off-road, and also some on-road manufacturers (Axle block bolt adjustment type vehicle).
- M10 is mainly used on KTM off-road models, and Husqvarna.

ZETA

TITANIUM

ZETA

WASHER

- Made of CNC machined Ti-6AL-4V
- Excellent accuracy, unlike common press machine punched washers.
- Reduce weight by replacing with titanium washers, as well as increasing strength, improved visual appeal.
- Lineup for the high frequency of use M6 , M8 and M10.

WASHER					
Part #	Size	Inner diameter	Outer diameter	Thickness	
ZT20-1061	M6	6.4	12	1.6	
ZT20-1081	M8	8.4	16	1.6	
ZT20-1101	M10	10.4	20	2.1	

ZETA WHEEL NUT SET for NINJA H2/H2R

- 64 Lightweight, high-strength wheel nut made of titanium.
- 70 g lighter than OEM nut kit.
- Comes with Titanium washer.

Part #	Size	Kit
ZT39-1315	M12 P=1.25	5 pcs

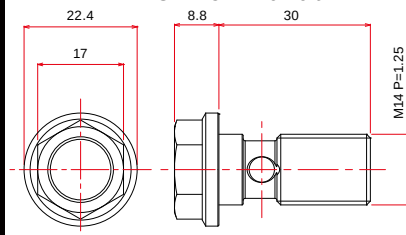

ZETA CYLINDER HEAD BOLT

- Side bolt for cylinder head to optimally dress up the engine.
- Oil line bolt for Kawasaki, engine plug for Suzuki oil cooling engine and Katana offered.
- Please use new O-ring and gasket for installation.

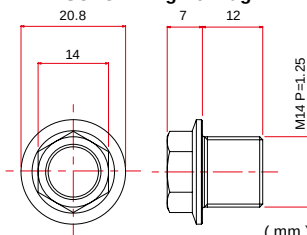

Part #	Size	Type
ZT15-5330	M14 P=1.5	KAWASAKI Oil Line Bolt
ZT15-5530	M14x12 P=1.25	SUZUKI Engine Plug

KAWASAKI Oil Line Bolt

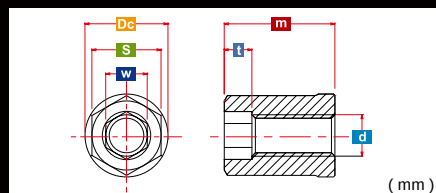

SUZUKI Engine Plug

ZETA EXHAUST NUT

- Titanium exhaust nut does not rust like OEM steel exhaust nuts.
- Flange design, can be tightend with 6 mm wrench or hex wrench.

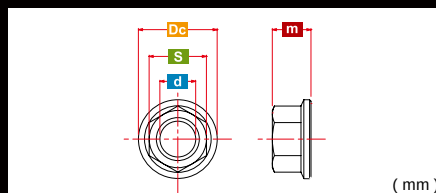

Part #	d	S	Dc	w	m	t	qty
ZT23-1061	M6 P=1.0	10	12	6	16	4	1
ZT36-1068	M6 P=1.0	10	12	6	16	4	8
ZT23-1081	M8 P=1.25	12	14	8	18	4.5	1
ZT36-1088	M8 P=1.25	12	14	8	18	4.5	8

ZETA FLANGE NUT COMPACT

- Titanium compact head size nut.
- Attained one size smaller head design because of its durable and light weight Ti-6AL-4V material.
- Great to use in high tightening torque and high-temperature situations.
- Sold in single pieces.

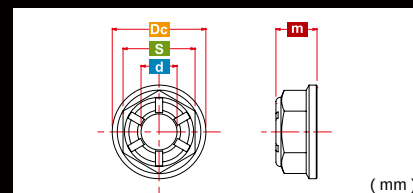

Part #	d	S	Dc	m
ZT21-2051	M5 P=0.8	7	9.5	4.7
ZT21-2061	M6 P=1.0	8	11	5.4
ZT21-2081	M8 P=1.25	10	14	6.8
ZT21-2101	M10 P=1.25	12	17	8.2

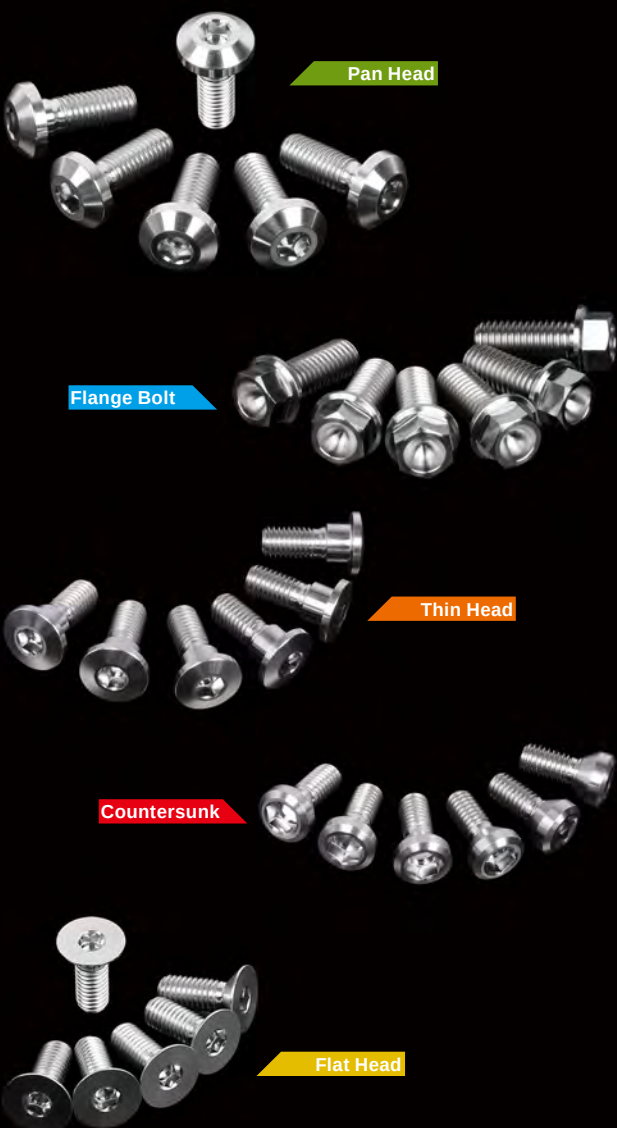

ZETRA FLANGE LOCK NUT

- ZETA original locking function. No use locking plate or locking nylon used.
- Original locking function holds secure, but has less damage to the bolt than U lock nut.
- Sold in single pieces.

Part #	d	S	Dc	m
ZT21-1051	M5 P=0.8	8	11	4.9
ZT21-1061	M6 P=1.0	10	13	5.7
ZT21-1081	M8 P=1.25	12	16	7.6
ZT21-1101	M10 P=1.25	14	19	9.6
ZT21-1121	M12 P=1.25	17	23	11.6

ZETA BRAKE DISC BOLT

- Titanium brake disc bolts kit.
- Different bolt head design from OE bolts for better workability.
- Available as a kit for specific models.
- Available for sport bikes and off road bikes applications.

Application OFF ROAD BIKE : P242 ➡

Application ON ROAD BIKE : P244 ➡

Front DISC BOLT (YZ250FX)
Counter Sunk M6 x 14 **ZT31-2636**

Rear DISC BOLT (KX450F)
Thin Head 10 mm - M8 x 14.5 **ZT31-3724**

#1 Quantity of front discs for one side.

#2 With lock nut. Without nut, ZT31-5616 (6 qty), ZT31-5614 (4 qty)

#3 Disc bolts only. ZT21-1061 (lock nut) is required for installation

* [-] No drum brake, or no special with configuration.

* The following compatibility table is for sales part number of common models, if model is not shown on the table, please check OEM size prior to purchasing.

* Apply locktight when installing disc bolts.
