STOPPING THE WORLD'S FASTEST.

Moto-Master products represent one of the finest lines of replacement and high performance motorcycle brake systems available.

Ever since our founding in 1997 we are driven by the desire for innovation. The Ultra-lite, and later-on, our revolutionary Flame rotors are some of the many innovations that have given Moto-Master a solid reputation as a leading aftermarket brake systems manufacturer.

Within a decade after our founding, Moto-Master has managed to secure many National, US and World Championship titles, and we have grown into today's dominating brand in Motocross Grand Prix racing. Many riders worldwide rely on Moto-Master to give them the competitive edge when it comes to stopping power and reliability.

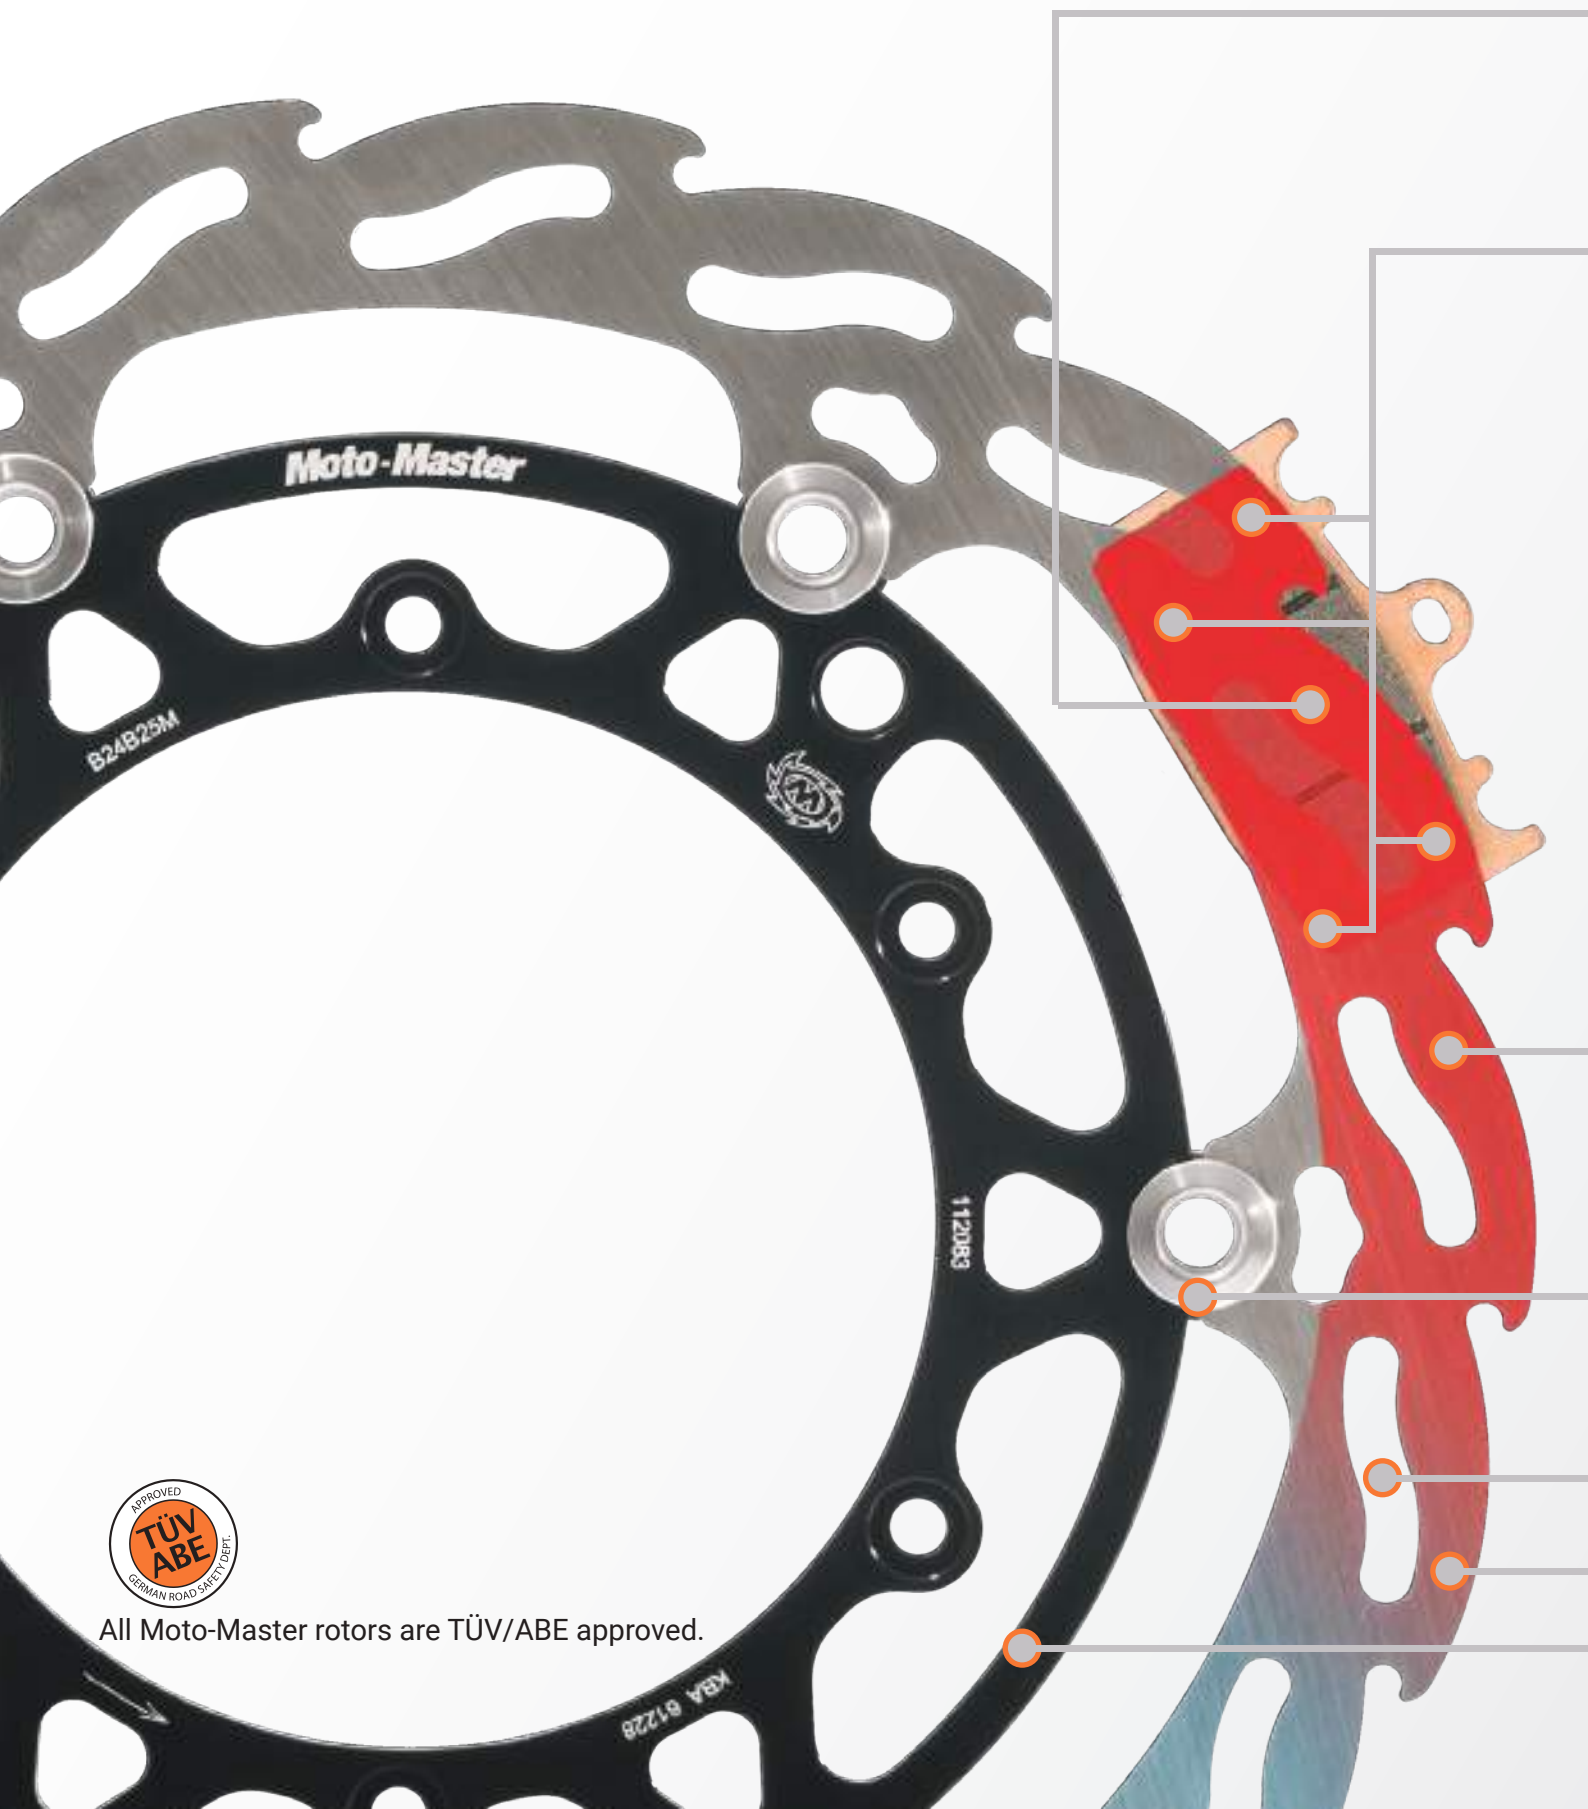

All our R&D, engineering, manufacturing, and warehousing are located in the Netherlands. Customer care, flexibility and rapid availability are key words within our ISO 9001:2015 and TÜV - KBA certified organisation.

We stock one of the widest range of brake rotors on the planet to make sure our distributor network is provided around the clock.

Flame | ADVANTAGE

Next to the premium quality steel alloy which is used to give Moto-Master brake discs unsurpassed friction characteristics and durability, much of the superior performance of a Moto-Master Flame disc lies embedded within its unique design.

All Moto-Master rotors are TÜV/ABE approved.

MAXIMUM CONTROL

Flame shaped venting slots and outer perimeter ensure an equal amount of contact surface between the brake pad and disc throughout the whole rotation of the disc. This results in smooth and more predictable braking action which allows you to brake harder.

REDUCED BRAKE PAD WEAR

The Flame design ensure the brake pads are always evenly supported on the rotor surface. This prevents the pads from tilting under high pressure.

OPTIMAL COOLING & REDUCED WEIGHT

Flame shaped venting slots are lined up in the linear direction of movement which allows oversize slots without them chipping away at the brake pads.

DISC & BRAKE PAD CLEANING

The Flame shaped outer perimeter and venting slots overlap to continuously clean the whole brake pad contact surface while hot gasses are immediately evacuated.

SUPERIOR DISC FINISH

Specialized laser cutting technologies provide a clean cut edge which won't corrode. Disc thickness is parallel within a 0.003mm margin. This eliminates any possible brake lever pulsation while giving unsurpassed rider feedback.

LIGHTWEIGHT FLOATER

The rotor is fitted to the inner carrier using a lightweight design stainless steel floater for maximum strength and durability.

CRAFTSMANSHIP

The inner carrier is precision CNC machined out of billet aircraft aluminium and anodized to provide the strongest and most durable carrier possible.

260MM FLOATING DISC

DESIGN & FUNCTION

- Offers a performance gain up to 25% over stock.
- Lightweight design with high impact resistant steel inner carrier.
- Flame design offer optimal cooling and unsurpassed smooth and more predictable braking action, which allows you to brake harder.
- Ideal to withstand the abuse of enduro riding in natural, rocky terrain due to the smaller diameter and durable steel inner carrier.
- For best performance we recommend using Moto-Master brake pads with the matching pad compound that best suits your type of riding.
- These oversize discs **MUST** be used with our adapter bracket in order to relocate the stock brake caliper to the correct position (depending on type of bike).

Flame Supermoto Street 320MM STREET DISC

Our Supermoto Street Rotor is the ideal solution for the rider that wants race-oriented performance without the cost of switching to a full Supermoto Racing setup. A Supermoto Street Kit is also available, see page 76.

- **NOTE:** This Rotor **MUST** be used with our Supermoto Street Adapter. Supermoto Street Rotors are not compatible with our 4-piston racing Caliper.

DESIGN & FUNCTION

- Designed for use with your stock (OEM) brake caliper.
- Supermoto Street Discs are 4mm thick and utilize a 320mm floating design.
- The Flame outer ring is mounted to a steel inner carrier using 10 lightweight design stainless steel floaters.
- TÜV/ABE approved.
- For optimal performance we recommend using Moto-Master SinterPRO Racing GP brake pads with this brake setup.
- The Supermoto Street setup can be made even more powerful by changing the original (OEM) master cylinder to our Radial Master Cylinder and Steel Braided Brake line.

Supermoto Street Caliper Bracket 320MM DISC

Moto-Master lightweight design, ensure perfect fit and exact caliper position on brake disc while keeping un-sprung weight to a minimum. CNC machined from billet aircraft aluminium, black anodized and laser marked. TÜV/ABE approved.

Brake Lines

ORIGINAL REPLACEMENT

Our stainless steel braided brake lines are lightweight and durable. They provide a significant increase in feel and response due to reduced flex compared to a standard OEM plastic line.

DESIGN & FUNCTION

- Brake line consists of seamless extruded PTFE hose liner with a stainless steel wired braid which is protected by a durable and lightweight PVC covering.
- Stainless steel banjos are used to eliminate any possible corrosion.
- The banjos are adjustable to ensure torque-free mounting
- The brake lines come with washers and fitment instructions.
- Our stainless braided brake lines eliminate that “spongy” feeling of standard plastic brake lines.
- These brake lines are designed for original replacement. For use with our Supermoto Master cylinder check applications on page 60.
